

Bulletin 47

BLENDED 1980 MORTALITY TABLES

August 2, 1984

On August 1, 1984, Indiana Department of Insurance Rule 760 IAC 1-32 on the use of blended 1980 CSO and CET tables for nonforfeiture values became effective.

Under this rule, minimum reserve requirements are not affected and still need to be calculated on sex distinct 1980 CSO tables.

Should you require a copy of this Rule we will accommodate you.

Don H. Miller
